

Nguyen Dang Khoa

Solution Architect

mail@nguyendangkhoa.info · Ho Chi Minh City, Vietnam · linkedin.com/in/your-handle · github.com/your-handle

I'm a Solution Architect working on design systems and content infrastructure. This site is where I keep track of what I'm building, where I've worked, and what I'm reading – written mostly for myself, published in case it's useful to you.

EXPERIENCE

Senior Software Engineer 2023 – Present

B2B SaaS company

Lead engineer on the platform team. Own the design system and the content infrastructure powering twelve regional sites. Mentor three engineers.

TypeScript · Java · Design Systems · Leadership

Software Engineer 2021 – 2023

Financial services company

Built and operated backend services for payments reconciliation and risk reporting. Took the reconciliation process from three days of manual work to twenty minutes.

Python · Kotlin · Kafka · Postgres

Full-stack Developer 2019 – 2021

Digital agency

Agency work across a dozen client projects – e-commerce, editorial sites, internal tools. Learned to ship fast and read someone else's codebase without complaining.

JavaScript · PHP · React · AWS

Junior Developer 2018 – 2019

Software consultancy

First engineering role. Maintained an internal reporting tool and wrote the integration tests nobody else wanted to write.

Java · Selenium · MySQL

SKILLS

AI & Agentic Software Engineering

OpenAI API · LangChain · MCP · RAG · PyTorch · Prompt Engineering · Agent Orchestration · Evals

Software Architecture & Design

System Design · Microservices · Design Patterns · REST API · GraphQL · Kafka · Domain-Driven Design · Event Sourcing

Programming Frameworks & Skills

TypeScript · JavaScript · Python · Java · Go · React · Next.js · Node.js · Tailwind · HTML5 · CSS3

Infrastructure & DevSecOps

Docker · Kubernetes · AWS · Terraform · CI/CD · Git · Linux · DevSecOps · Observability

Software Solutions & Packages

CMS · Postgres · MongoDB · Redis · Vector DB · Cloud · Mobile

Fundamental Skills

Data Structures · Algorithms · Testing · Performance · Accessibility · Documentation · Agile

SELECTED PROJECTS

Component Library & Design Tokens 2025

B2B SaaS (under NDA)

Architecture: Framework-agnostic web components · tokens compiled from one JSON source to CSS/iOS/Android

Role: Lead engineer · set the API conventions and the adoption path

Impact: 48 components · adopted by 6 product teams
TypeScript · Web Components · Storybook

CI Telemetry Pipeline

2025

Personal project
Architecture: Event ingest -> columnar store -> rollup queries · flake detection over rolling windows
Role: Sole author, design through operation
Impact: 2M events/day · surfaced flaky tests that cut build time 38%
Go · ClickHouse · Grafana

Payments Reconciliation Engine

2024

Financial services (under NDA)
Architecture: Scheduled DAG · idempotent matching across multiple provider feeds · exception queue for human review
Role: Designed the matching model and owned the rollout
Impact: 1.4M transactions/cycle · 3 days of manual work -> 20 minutes
Python · Postgres · Airflow

Headless Content Platform

2024

B2B SaaS (under NDA)
Architecture: Headless CMS · one editorial workspace fanning out to many regional front-ends · per-market publishing rules
Role: Platform lead · content model, publishing rules, front-end integration
Impact: 12 regional sites · 4 languages from a single workspace
Java · Magnolia · React

Local-First Analytics Notebook

2023

Personal project
Architecture: In-process OLAP engine compiled to WASM · query execution entirely client-side, no server round-trip
Role: Sole author
Impact: 10GB local datasets · zero network calls by design
Rust · DuckDB · Svelte
